

Here at Bain Bully Kennels we take our dog's diet very seriously. We started feeding our dogs TEFCO products in 2012. Immediately we saw a difference. Our two year old American Bully was underweight when we changed his diet from kibble to a complete 100% raw diet and in months he gained 17 lbs! His coat was fuller and his stool much smaller. We entered him into the show ring and within three events he became ABKC Champion. He is currently an ABKC Grand Champion and continues to dominate the show ring. Genetics and diet play an equal part in dog's development and overall health. So glad we are a part of the TEFCO family!
