

The undersigned has had pure bred German Shepherd dogs for 30 years and today I have two and one All American breed. I have no children, so my dogs fill the place and have the best of training, equipment and food that I know of.

However I was dissatisfied with their food. Everything I tried did not live up to its advertising, nor its results or liking of my dogs.

Then I was introduced to performance dog food made by TEFCO. I did due diligence and called the manufacturer with questions. Mr. Jerry Briffa's answers and my research led me to try this food. It did not take long to see that my dogs had more energy, their coats were shinier and softer and their teeth were cleaner. This was clearly the best.

Retailers in Louisiana were not so reliable or were located at an inconvenient distance. I again called the manufacturer, this time to complain. After a heated discussion, Mr. Briffa said "why don't you become a distributor?" and just as quickly I responded "I will". I have no regrets.

I developed customers and this allows us to buy in bulk. Every one of my customers love and rely on Performance Dog. It is the only dog food that I will use. The ingredients and food processing are the key to premium food – the best.

That's what I demand – and happily get.
